#### Projekt Zaliczeniowy

Jakub Rękas, Ernest Szlamczyk

#### Wstęp

Projekt ten ma na celu proste opracowanie statystyczne wyników porównania działania wybranych algorytmów minimalizacji stochastycznej.

Do porównania wybraliśmy algorytmy:

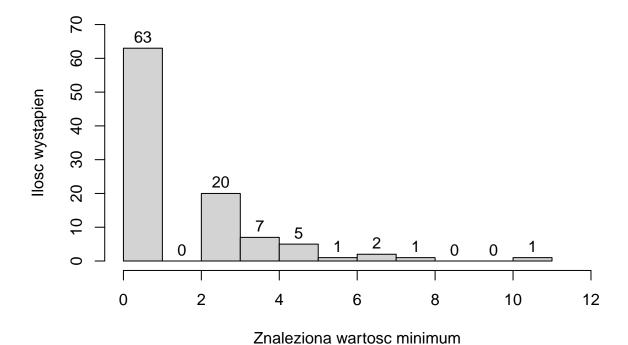

- \* Poszukikwanie przypadkowe (Pure Random Search, PRS)
- \* Metoda wielokrotnego startu (multi-start, MS)

Dodatkowo użyliliśmy funkji:

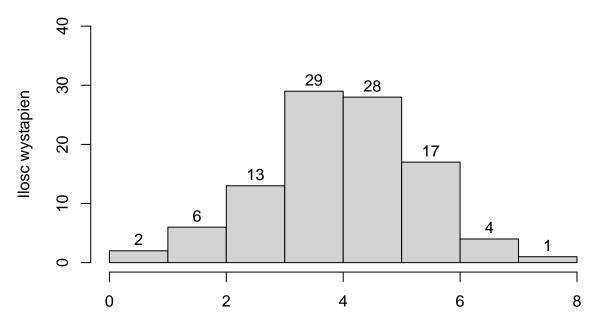

- \* Ackley'a
- \* Rastrigina

#### WYNIKI

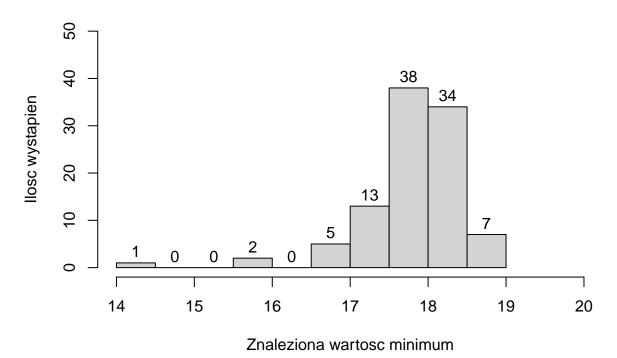

#### Funkcja Ackleya 2D, MS

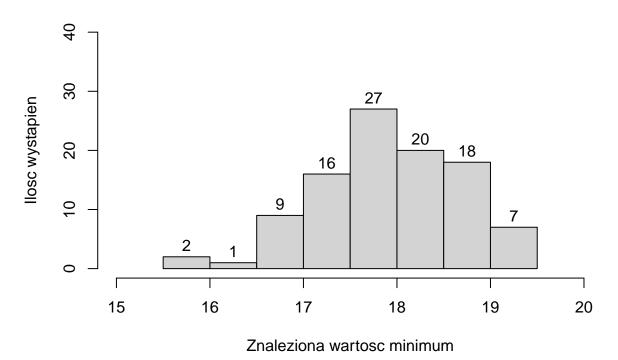

## Funkcja Ackleya 2D, PRS

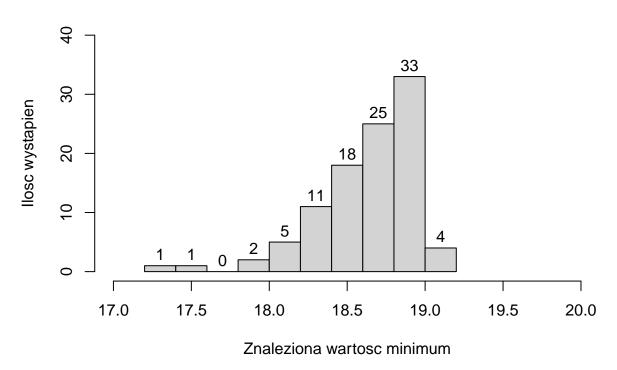

## Funkcja Ackleya 10D, MS

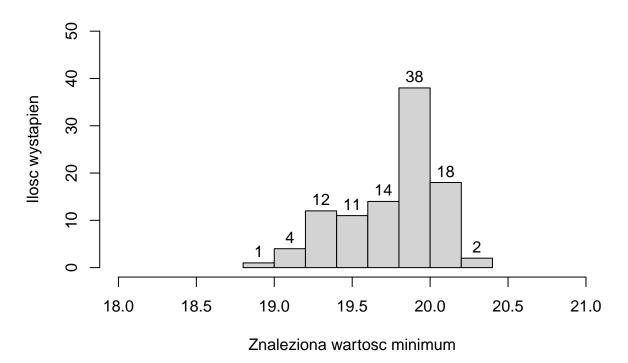

## Funkcja Ackleya 10D, PRS

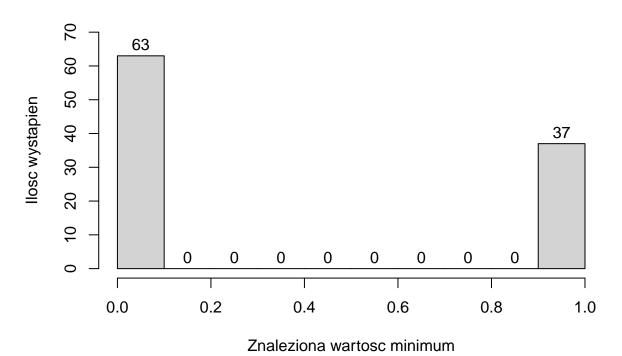

#### Funkcja Ackleya 20D, MS

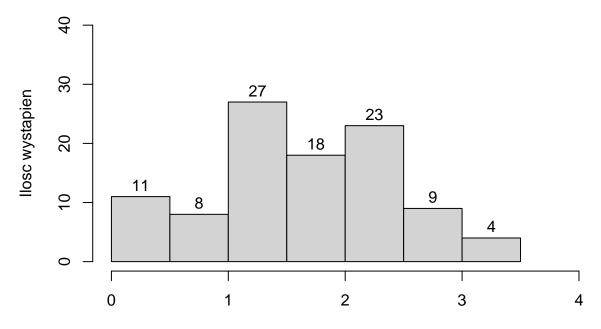

## Funkcja Ackleya 20D, PRS

#### Funkcja Rastrigina 2D, MS

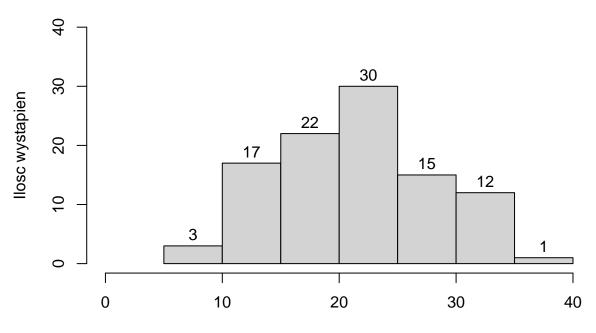

## Funkcja Rastrigina 2D, PRS

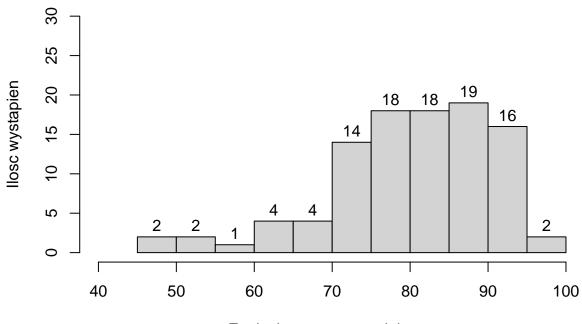

Znaleziona wartosc minimum

## Funkcja Rastrigina 10D, MS
